

Imperial Mining to Present on the Crater Lake Scandium Project in Stuttgart, Germany and PDAC 2019

MONTREAL, QUEBEC – February 5, 2019 – Imperial Mining Group Ltd. ("Imperial" or the "Corporation") (TSX VENTURE: IPG) is pleased to provide an update on its strategic scandium marketing initiatives on the Crater Lake Project, in Québec. Imperial's President, Peter Cashin, will be speaking on the Crater Lake scandium opportunity at a major German automotive OEM Conference in Stuttgart in late February, and at PDAC 2019 in Toronto during the Technology Metals session on March 4th as detailed below. In addition, Imperial will be undertaking intensive investment marketing in the UK and EU in mid-February and Québec in mid-March to speak on its high-quality exploration & development projects and its future activities.

DETAILS OF THE PRESENTATION OPPORTUNITIES:

EVENT: Werkstoff Plus Auto Conference: 9th Meeting for New Vehicle and Material Concepts
TITLE: *"Scandium and its Critical Importance to Aluminium Lightweighting: Development of the Crater Lake Scandium Project, Québec, Canada"*
WHERE: Maritim Hotel, Stuttgart, Germany
WHEN: **Thursday, February 21st, 2019 at 2:55 pm**

and,

EVENT: Prospectors and Developers Association of Canada (PDAC) 2019 International Convention
SESSION: Technology Metals Technical Session
TITLE: *"Growing Markets for Scandium and the Crater Lake Scandium Project, Québec"*
WHERE: Metro Toronto Convention Centre, Room 717, Toronto, Ontario, Canada
WHEN: **Monday, March 4th, 2019 at 3:40 pm**

Imperial continues to actively promote the significant potential for scandium as a critical lightweighting additive to aluminium alloys for the aerospace, automotive, fuel cell and defense industries to investors. These initiatives aim to attract strategic investment in support of the development of the Crater Lake scandium project. Imperial has secured several important introductions to consumers and manufacturers of products and alloy materials that utilize scandium. Efforts are well underway to expand the uses for scandium-modified aluminium alloy products through collaborative material innovation research

programs in the UK and EU. Scandium has been variously referred to as the “Miracle Metal” and a “Spice Metal” because, when alloyed with aluminium alloys in small quantities (0.2% to 0.4%), it produces strong, flexible and weldable lightweight materials critical for next-generation airplanes and automobiles. This critical alloy has shown favour for Electric Vehicles (EVs) and internal combustion vehicle manufacturing. However, very limited scandium supply is holding back more widespread adoption of this new technology metal and new supply chains must be created to serve this growing market.

“We are starting to see significant interest in developing new scandium supply chains in North America,” said Peter Cashin, Imperial President & CEO. “The exceptional quality and size potential of the Crater Lake scandium deposit strategically positions Imperial to become a critical new supply-chain contributor to this emerging and potentially lucrative market.”

ABOUT IMPERIAL MINING GROUP LTD.

Imperial is a new Canadian mineral exploration and development company focused on advancing its copper-zinc, gold and technology metals properties in Québec. Imperial is publicly listed on the TSX Venture Exchange as “IPG” and is led by an experienced team of mineral exploration and development professionals with a strong track record of mineral deposit discovery in numerous metal commodities.
